

Best Outdoors

Packer MAXX[®] clp

This plot was disced and broadcast seeded then passed across once with the Best Outdoors Packer Maxx[®] clp. After five days, notice the early germination where the Best Outdoors Packer Maxx[®] clp compacted soil over the seed.

Same plot as on the left after twelve days. Multiple passes are recommended for even greater germination. One pass for chosen for demonstration purposes.

This plot has not been tilled for four years. It was Round Up sprayed, NO TILL broadcast seeded, and packed once with the Best Outdoors Packer Maxx[®] clp. This is the result five days after planting.

The same NO TILL plot after twelve days. Ferns are tough to kill.
